Skills

- JavaScript, TypeScript, C#
- React, Next.js, Express.js, .NET Core
- Redux, Tailwind CSS, HTML, CSS
- PostgreSQL, Supabase, Firebase
- WebSockets, Docker, Postman
- Teamwork, Communication

Foreign Languages

English: Upper intermediate B2

About me

I'm a third-year Computer Science student specializing in full-stack web development with a strong focus on JavaScript, React, Next.js, Node.js, and TypeScript. I build scalable, maintainable applications with clean code and solid architecture. Passionate about user-focused design and staying up-to-date with modern web practices.

Experience

- **Frontend Developer Intern**
itSilesia April 2025 - Present
 - Developed dynamic and responsive user interfaces using React, Next.js, and TypeScript, following component-based architecture
 - Translated Figma designs into functional and pixel-perfect UI, ensuring responsiveness across various screen sizes
 - Built reusable components to improve code consistency, readability, and maintainability across the application
 - Integrated the frontend with RESTful APIs using the Fetch API, ensuring smooth data flow and synchronization with the backend
 - Designed and implemented the full authentication system (login and registration), actively shaping core application functionality

Education

- **Bachelor of Computer Science**
Silesian University of Technology 2022 - Present

Focused on software engineering, algorithms, and full-stack web development. Gained practical experience through academic projects using technologies like React, Node.js, and .NET Core.

Projects

- **Filestorix - Cloud storage web app**
github.com/Suplice/Filestorix

Stack: Next.js, React, TypeScript, Go, PostgreSQL, Redux, Tailwind CSS

Secure file management platform inspired by Google Drive. Enables users to upload, preview, organize, and download files with real-time UX and custom folder management.

 - Upload files with support for image and PDF preview directly in the browser
 - Create, rename, and organize folders for structured content management
 - Move files to trash, hide them from view, and restore or permanently delete
 - Responsive and intuitive UI with smooth animations and real-time updates
- **Wezzer - Voice chat platform**
wezzer-steel.vercel.app

Stack: React, TypeScript, Django, Supabase, WebRTC, WebSockets, Tailwind CSS

A real-time communication app for group discussions with a focus on voice interaction. Designed for smooth, accessible user experience and community-driven collaboration.

 - Join or create custom voice rooms for real-time group conversations
 - Multiple authentication options for flexible access
 - Seamless multi-user interaction with live updates and smooth transitions
 - Clean, animated UI optimized for clarity and responsiveness
